

# 3 PHASE ONLINE UPS

Designed for the most demanding environments.

IP21 minimum. (higher IP rating as option)

Wide frequency tolerance

Paralell redundant capability

Custom input and output options

Extensive monitoring options

Built in isolation transformers

This series of UPS is specially designed to meet the demands for marine and offshore applications. And will provide very high reliability in harsh industrial environments

## ▶ Standard equipment

- RS232/485 serial port
- Integrated LAN interface
- Integrated isolation transformers

## ▶ Accessories

- Parallel kit
- Load shedding outputs
- Long battery backup time
- External maintenance bypass
- Extra battery charger
- Permanent Isolation controller

## ▶ Communication options

- Programmable dry contacts
- Remote access panel
- GSS interface (generator management)
- UNI Vision control software
- Netvision control software
